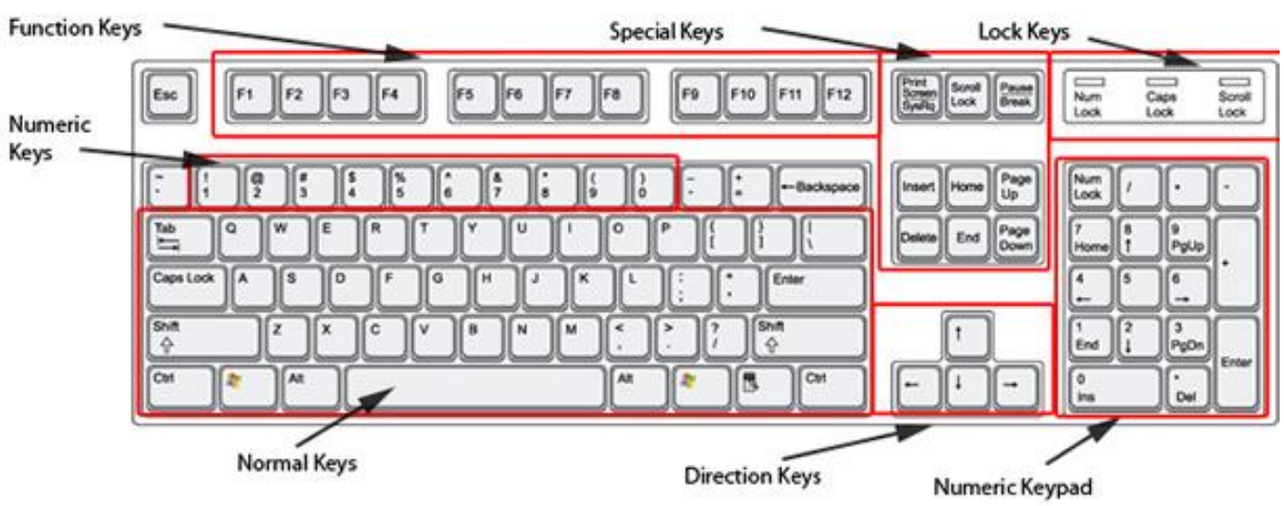
Jemma Development Group, Using Computers 2nd Edition

INTRODUCTION

Technology follows a wide range of developments. One of a few things is the use of computers. It is a large factor in connecting us with other people. We have to be aware that we have to capacity in using appropriate technology. Office Productivity is a course that identify the skills of the different Microsoft Office Applications, such as Microsoft Word; Microsoft Powerpoint, Microsoft Excel and Microsoft Publisher. Developing the skills in using the software allow us to identify effective tools to use in different data processing.

Computer keyboard looks like a typewriter at a first glance but they differ when it comes to its application. We don't need to punch keys hard compared to the typewriter. Typewriter is only limited to document functions; Computer keyboards can formulate documents, images and other document formatting.

Identifying the parts of the keyboard:



The keyboard is grouped into several sections:

- Main Keypad – all main keys are placed which are arranged in a QWERTY pattern.
- Numeric Keypad – numeric keypad is typically located at the rightmost side of the keyboard.
- Function Keys – they are labeled F1-F12 .These functions will depend on the software currently used.

COMPUTER LITERACY PROGRAM

EXAMPLE

A. Enumerate possible document formats using Microsoft Office Applications and its importance
   - Document Format
   - Image Format
   - Letters
   - Invitations
   - Headlines
   - Announcements
   - Table Formats

B. Proper Hand and Finger Positioning on the Keyboard

   Identify your fingers
   - Thumb
   - Pointer
